

ABSTRACT

[0043] A method for operating a data communication service in a global system for mobile communication is provided. The method comprises deciding whether a user equipment requests the data communication service in a real time; 5 deciding whether the user equipment requests the data communication service in a home area of a first mobile switching center where the user equipment has been registered; deciding whether a reject data has been set in the user equipment in a pending status, if the user equipment requests the data communication service in the home area; and providing the data communication service to the user 10 equipment, if the reject data has not been set in the user equipment.
